

Improving Shoppit's Online Returns Process

Value definition & sustainability

Value definition: customer experience, operational efficiency, people and employee experience

Change sustainability: Post-implementation review, top management support, change champions, forums, communication plan, site visits

Danielle Pretorius | PRTDAN012 | 02 October 2024

1. Value Definition & Realisation

Value Definition	Definition	Importance/Reasoning	Measurement Metrics
Customer Experience	Improving customer experiences and perceptions of the returns process to fulfil the online business lifecycle.	• Main concern to be addressed as it influences customer satisfaction, loyalty and sales levels • Positive experience of the returns process encourages customer retention and positive business reviews • Directly contributes to business growth (profitability)	• Customer satisfaction surveys post-return • Customer complaints • Customer support required during process • (Statistics from customer support centre)
Operational efficiency	Streamlining the returns process by reducing complexity of the returns process, speeding up returns processing, and reducing errors.	• Reduction of possible fraud (reporting of returns) • Guides adequate use and allocation of resources • Faster return processing times • Allows for increased sales volume through operational efficiency	• Turnaround time of completing returns • Number of completed returns without errors • Process improvements; reduction in workload/amount of employees required for customer service • Time taken to complete tasks now vs before
People and employee experience	Providing employees with support, training and tools to adapt to new returns process. Staff roles and tasks may change with the increase in automation and simplified process.	• Ensuring workforce is adjusting to the change and receiving it positively • Providing staff with resources to perform new/amended duties adequately • Enables staff to provide better service provision and customer service	• Employee satisfaction surveys on new process • Feedback on training effectiveness • Personal experiences • Employee success stories

Value Definition	Definition	Importance/Reasoning	Measurement Metrics
Feasibility	Ensuring the returns process is integrated into the organisational system, can be scaled as Shoppit grows, and is cost effective.	• Assess whether the new returns process is financially feasible for Shoppit • Test if the returns process is functioning adequately in conjunction with existing systems (customer service, IT infrastructure) • Scalability ensures the system can handle larger volumes of orders as the business grows without having to make further adjustments	• Cost-efficiency • Budget adherence tracking • Cost-benefit analysis • System integration • Measure time, effort and cost required to integrate systems • Scalability testing • Simulated growth scenarios • Assessing system during peak periods

2. Ensuring Change Sustainability

Post-implementation review

Conducted after pilot to determine how value has been realised, lessons learnt, and how to improve processes.

- Evaluates project compared to before implementation.
- Information gathered from post-implementation review will be incorporated into strategy for ensuring change sustainability.
- Identifies leadership support required to sustain change.

Top management support

Dissemination of knowledge and involvement of management to sustain change post-implementation.

- Important to engage stakeholders, particularly leadership, with change outcomes.
- Integrating project management system into general management system for long-term change sustainability.

Presence of change champions

Subject matter experts (SMEs) who provide on-the-ground support.

- Provides assistance with integrating change into normal processes.
- Provide operations support and ensure process adherence in terms of daily operations.
- Handling fast turnaround time for errors.
- Identify success stories and share them.

Communication plan

Briefs or Emails sent out to engage change with stakeholders at all levels.

- Continued communication post-implementation to whole organisation.
- Process reminders, progress reports.

Forums

Progress meetings; weekly and monthly engagements after implementation.

- Weekly engagements in first 2 months, Monthly engagement thereafter for 6 months.
- Discuss issues raised, success stories and what has been learned.
- Discuss information from report monitoring.
- Monitoring returns process efficiency & employee and customer feedback.

Site visits

Linking in-house operations and 3rd party delivery services.

- Gain feedback from employees on new returns process operations.
- Engage with personal experience feedback of employees.
- Identify challenges and risks faced post-implementation to ensure they are addressed.
